METHOD, SYSTEM, AND PROGRAM FOR PROVIDING INFORMATION ON SCHEDULED EVENTS TO WIRELESS DEVICES

ABSTRACT

Provided is a method, system, and program implemented by a wireless device to provide information on a scheduled event to a calendar database. The wireless devices receives a code and transmits the received code to a server including a calendar database for the user of the transmitting wireless device including scheduled event records. The wireless device receives from the server a scheduled event record including information on one scheduled event associated with the code and renders calendar information at the wireless device including information on the scheduled event included in the scheduled event record.
